INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF MAI KHALA HYDROPOWER LIMITED

Reports on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **Mai Khola Hydropower Limited** (hereinafter referred to as "the Company"), which comprises the statement of financial position as at Ashadh 31, 2080 (corresponding to July 16, 2023), the statement of profit or loss and other comprehensive income, the statement of change in equity, the statement of cash flows for the year then ended, and note to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respect, the financial position of the Company as at Ashadh 31, 2080 and its financial performance and its cash flows for the year then ended in accordance with Nepal Financial Reporting Standards (NFRS).

Basis for Opinion

We conducted our audit in accordance with Nepal Standards on Auditing (NSAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of financial statements section of our report. We are independent of the Company in accordance with the code of ethics for the professional accountant issued by The Institute of Chartered Accountants of Nepal together with the ethical requirement that is relevant to our audit of the financial statements under the provisions of the Company Act, 2063, and we have fulfilled our other ethical responsibilities in accordance with these requirements and ICAN code of ethics for professional accountants. We believe that the audit evidence we have obtained is sufficient and appropriate to provide basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the year ended Ashadh 31, 2080. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined that there are no key audit matters communicated in our report.

Information Other Than the Financial Statements and Auditor's Report Thereon

The management of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained during the course of audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we concluded that there is a material misstatement therein, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with the NFRS, and for such internal control as management determines is necessary to enable preparation of the financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatements, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not guarantee that an audit conducted in accordance with NSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
 - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
 - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
 - Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosure in the financial statement or, if such disclosure are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease as a going concern.
 - Evaluate the overall presentation of the financial statements including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation,
- We communicated with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit finding, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

On the basis of our examination, we would like to report that:

- a. We have obtained all the information and explanations, which were necessary for the purpose for our audit.
- b. The enclosed statement of financial position, statement of profit or loss and other comprehensive income and statement of cash flow have been prepared as per the Company Act, 2063 are in agreement with the books of account maintained by the Company.
- c. In our opinion, proper books of accounts as required by law have been kept by the Company, so far as appears from our examination of those books.
- d. In our opinion and to the best of our information and according to the explanations given to us and from our examination of the books of account of the Company, we have not come across the cases where the Board of Directors or any member thereof or any employee of the Company has acted contrary to the provisions of law or caused loss or damage to the Company relating to the accounts of the Company.
- e. The company has not complied with the provisions of Bonus Act, 2030.

26.1. Basic Earnings per share

The earnings and weighted average number of equity shares used in the calculation of basic earnings per share are as follows.

Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise share options granted on convertible preference shares, debentures or to employees.

Since, the company does not have any convertible instruments and has not granted any options to its employees, diluted EPS is considered the same as basic EPS.

This is the separate financial Statements of the Company.

2 SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of Compliance

The financial statements have been prepared in accordance with the applicable Nepal Financial Reporting Standards (NFRS) as issued by the Accounting Standard Board (ASB), Nepal. The financial statements have also been prepared in accordance with the relevant presentational requirements of the Companies Act, 2063 of Nepal.

These financial statements for the year ended Ashah 31,2080 are the first report prepared by complying NFRS for all periods upto and including the year ended Ashah 32, 2079, the company prepared its financial statements in accordance with the Nepal Accounting Standards (hereinafter referred to as 'Previous GAAP') for its statutory reporting requirement in Nepal. The financial statements for the year ended 32 Ashah, 2079 and the opening Balance Sheet as at Shrawan 1,2078 have been restated in accordance with NFRS for comparative information. These financial statements were authorized for issue by the Board of Directors on 2080/04/23. The Board of Directors acknowledges the responsibility of preparation of financial statements.

Reconciliations and explanations of the effect of the transition from Previous GAAP to NFRS on the Company's Statement of Financial Position and Statement of Profit or Loss and Other Comprehensive Income are provided in Note 4. The transition date of NFRS is Shrawan 1, 2078.

2.2 Basis of Preparation of Financial Statements

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below:

- i) Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.
- ii) Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.
- (iii) Financial assets and financial liabilities measured at fair value (refer accounting policy on financial Instruments).
- (iv) Financial statements prepared under Going concern and accrual basis.
- (v) The financial statements are presented in Nepalese Rupee (Rs.), which is the functional and presentation currency of the Company.

2.3 Property, Plant and Equipment

- i) Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset.
- ii) Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

- iii) The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.
- iv) An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal, any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognized.

2.4 Depreciation & Amortization

- i) Depreciation is recognized so as to write off the cost of assets less their residual values over their useful lives, using the diminishing balance method.
- ii) The estimated useful life and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Category of Assets	Depreciation Rate
Office Equipment	25%
Furniture & Fixtures	25%
Automobiles	20%
Other Assets	15%

- iii) The depreciation rates of the assets at which the assets are depreciated are as follows: -

The Company has depreciated 3 MW Super Mai Cascade Project on Straight Line Method (SLM). The period of depreciation is 31 Years and 6 Months which is remaining Generation License period of the project from Ashad End 2079. Further Company has remaining Power Purchase Agreement (PPA) of 28 Years from Ashad End 2079.

For transition to NFRS, the Company has elected to continue with the carrying value of all of its Property, Plant and Equipment recognized as of Shrawan 1, 2078 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

2.5 Impairment of Tangible and Intangible Assets:

An asset is considered as impaired in accordance with NAS 36 on Impairment of Assets when at the balance sheet date there are indications of impairment and the carrying amount of the asset, or where applicable the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the asset's net selling price and value in use). The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

2.6 Classification of Current and Non-current of Assets and Liabilities.

All assets and liabilities have been classified as current & non-current assets as per the company's normal operating cycle. Based on the nature of products and time between acquisition of assets for processing and their realization cash and cash equivalents, the company has ascertained its operating cycle as twelve months for the purpose of classification of currents & non-current classification.

2.7 Revenue from Contracts with Customers

Sale Of Electricity

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated rebates, penalties and other similar items.

Revenue from operations comprises of sale of power. It is recognized at an amount that reflects the consideration for which the Company expects to be entitled in exchange for transfer of power to the customer.

Revenue from sale of power is accounted in accordance with tariff provided in Power Purchase Agreement (PPA) with the Nepal Electricity Authority (NEA) and no significant uncertainty as to the measurability or collectability exist.

Other Income

Other income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably & significant reversal in the amount of revenue recognized will not occur in the future and consideration is expected to be received.

2.8 Employee Benefits

Compensation to employees for services rendered is measured and accounted for in accordance with NAS 19 on Employee Benefits.

Short Term-Employee Benefits

Employee Benefits such as salaries, allowances, and non-monetary benefits which fall due for payment within a period of twelve months after rendering service, are charged as expense to profit or loss in the period in which the service is rendered.

2.9 Borrowing Costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets is substantially ready for their intended use or sale. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

2.10 Income Tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from ‘profit before tax’ as reported in the Statement of Profit and Loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The company is currently enjoying tax holiday for the income from sales of power.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the

liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and Deferred Tax for The Year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

2.11 Leases

The Company, as a lessee, recognizes a right of use asset and a lease liability for its leasing arrangements, as the contract conveys the right to control the use of an identified asset. The contract conveys the right to control the use of an identified asset, as it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right of use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the lease term.

2.12 Cash Flow Statement

The Cash Flow Statement is prepared by the indirect method set out in NAS 7 on Cash Flow Statements and presents the cash flows by operating, investing and financing activities of the Company.

2.13 Provisions and Contingencies

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

A contingent liability is a possible obligation that arises from past event whose existence will be confirmed by the occurrence of one or more uncertain future events beyond the control of the company or present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligations or a reliable estimate of the amount of obligation cannot be made.

A contingent asset is neither recognized nor disclosed in the financial statements.

2.14 Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial Assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

Classification of Financial Assets

Debt instruments that meet the following conditions are subsequently measured at amortized cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

Effective Interest Method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the “Other income” line item.

Financial assets at Fair Value Through Profit or Loss (FVTPL)

Financial instruments that do not meet the amortized cost criteria or Fair Value Through Other Comprehensive Income (FVTOCI) criteria are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the ‘Other income’ line item. Dividend on financial assets at FVTPL is recognized when the Company’s right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

Impairment of Financial Assets

The Company applies the expected credit loss model(ECL) for recognizing impairment loss on financial assets measured at amortized cost, trade receivables and other contractual rights to receive cash or other financial asset.

Loss allowance for trade receivables with no significant financing component is measured at an amount equal to life time ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at

lifetime ECL The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

Financial Liabilities and Equity Instruments

Classification as Debt or Equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Financial Liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method or at FVTPL.

Financial Liabilities at FVTPL

Financial liabilities at FVTPL represented by contingent consideration that are measured at fair value with all changes recognized in the profit or loss.

Derecognition of Financial Instruments

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

2.15 First-Time Adoption – Mandatory Exceptions and Optional Exemptions

Overall Principle

The Company has prepared the opening balance sheet as per NFRS as of Shrawan 1, 2078 (the transition date) by recognizing all assets and liabilities whose recognition is required by NFRS, not recognizing items of assets or liabilities which are not permitted by NFRS, by reclassifying items from previous GAAP to NFRS as required under NFRS, and applying NFRS in measurement of recognized assets and liabilities. However, this principle is subject to the certain exception and certain optional exemptions availed by the Company as detailed below:

Derecognition of Financial Assets and Financial Liabilities

The Company has applied the derecognition requirements of financial assets and financial liabilities prospectively for transactions occurring on or after Shrawan 1, 2078 (the transition date).

Impairment of Financial Assets

The Company has applied the impairment requirements of NAS 36 retrospectively; however, as permitted by NFRS 1, it has used reasonable and supportable information that is available without undue cost or effort to determine the credit risk at the date that financial instruments were initially recognized in order to compare it with the credit risk at the transition date. Further, the Company has not undertaken an exhaustive search for information when determining, at the date of transition to NFRSs, whether there have been significant increases in credit risk since initial recognition, as permitted by NFRS 1.

Deemed cost for Property, Plant and Equipment, and Intangible Assets

The Company has elected to continue with the carrying value of all of its plant and equipment, and intangible assets recognized as of Shrawan 1, 2078 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Determining Whether an Arrangement Contains a Lease

The Company has applied Appendix C of NFRS 16 Determining whether an Arrangement contains a Lease to determine whether an arrangement existing at the transition date contains a lease on the basis of facts and circumstances existing at that date.

Deemed cost of Term Loan

The Company has elected continue with carrying value of term loan as on Sharawan 1 2078(Transition Date) Measured as per the GAAP and use that carrying value as its deemed cost as on the transition date.

3 Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In application of the Company's accounting policies, which are described in note 2, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical Judgements in Applying Accounting Policies

The following are the critical judgements, apart from those involving estimations that the directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognized in the financial statements.

Income Taxes

The Company's tax jurisdiction is in Nepal. Significant judgments are involved in determining the provision for income taxes, including the amount expected to be paid or recovered in connection with uncertain tax positions.

Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Useful Lives of Property, Plant and Equipment

As described above, the Company reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. There was no change in the useful life of property, plant and equipment as compared to previous year.

Impairment of Trade Receivables

The Company estimates the probability of collection of accounts receivable by analyzing historical payment patterns, customer status, customer credit-worthiness and current economic trends. If the financial condition of a customer deteriorates, additional allowances may be required.

Effective Interest Rate:

For the purpose of calculating effective interest rate principal part has been taken the basis of repayment schedules which is agreed by company and bank, Interest part is calculated using average interest rate from FY 2074/74 to FY 2079/80 of Rastriya Banijya Bank (RBB).

27. Segment Reporting

The management evaluates the Company's performance and allocates resources based on the analysis of various performance indicators, however the company is primarily engaged in only one segment, i.e., "Generation and sale of electricity" and that all its operations are in Nepal. Hence the Company does not have any reportable segments as per NFRS 8 "Operating Segments".

28.1 Financial risk management objectives

The company's principal financial liabilities, comprise trade and other payables and borrowings. The main purpose of these financial liabilities is to support its operations. The company's principal financial assets include trade and other receivables, cash & cash equivalents, that are derived directly from its operations. The company's activities expose it to a variety of financial risks: credit risk, liquidity risk, market risk. The company's Board of Directors reviews and sets out policies for managing these risks and monitors suitable actions taken by management to minimize potential adverse effects of such risks on the company's operational and financial performance.

28.2 Credit Risk

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company. The credit risk for the company primarily arises from credit exposures to trade receivables.

Trade and other receivables: The company's business is predominantly through sales of power. The company has PPA agreement with Nepal Electricity Authority (NEA). NEA is government body due to which the risk of credit default is significantly low.

Other Financial Assets: Credit risk from balances with banks and financial institutions are managed by maintaining the balances with highly reputed Commercial banks only.

28.3 Liquidity risk management

Liquidity risk is the risk that the company will encounter difficulty in meeting the obligations associated with the financial liabilities that are settled by delivering cash or another financial asset. The company's approach to managing liquidity is to ensure , as far as possible, that will always have sufficient liquidity to meet both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputations.

Liquidity risk tables

The following tables detail the company's remaining contractual maturity for its financial liabilities with agreed repayment periods.

29. Fair value measurements

This note provides information about how the Company determines fair values of various financial assets and financial liabilities.

Fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
 - Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
 - Level 3 inputs are unobservable inputs for the asset or liability.

The directors are of the belief that the carrying amounts of financial assets and financial liabilities recognized in the financial statements approximate their fair values.
